

OIC-CERT Journal of Cyber Security: Author Instructions

The objective of this document is to assist the authors to prepare articles for submission to the *OIC-CERT Journal of Cyber Security*.

To begin with, please make sure that the proofing language for the article is set to UK English (Select “Review” from the tabs at the top of the Word screen; then click on the “Language” icon, and select “English (UK)"); however, please ensure to maintain the original spelling when quoting material or referring to a specific title, organisation, proper noun, etc.

For instance, American English writers would use ‘defense’ while an Australian author would use ‘defence’; likewise, Finland has a ‘Defence Ministry’, but the U.S. has a ‘Department of Defense’.

The information below illustrates the appearance and format for page one and all the subsequent pages of the paper. In the example, Instructions for Authors is formatted as the paper’s title should be; *First A. Author* represents the name of the first author, etc.

ABSTRACT

Briefly introduce and state the purpose of the research. Provide an overview on how the problem was studied/solved and the methods used. This is followed by the principal findings and results and what the findings mean through a short discussion and conclusion explanation. (The abstract must be between 100-150 words.)

I. INTRODUCTION

This section should provide the background on the context of the problem. Justify and rationalize the importance of the research. State the problem statement and the matters to be discovered and the steps the researcher took to fill the gaps or improvements to the situation such as the research objectives, scope, solutions and the contribution of the findings.

II. RELATED WORK

This section is on the researcher’s evaluation on the relevant research works and shows the relationships between different works and how it relates to the study being done. This section also discusses on what other methodologies that have been used and how they are similar or different from the study conducted such as the relationship to the research methodology.

Documentation style

The documentation style for the *OIC-CERT Journal of Cyber Security* is adapted from the IEEE style. In general, this style calls for in-text citations and a reference list at the end of the paper.

In-text citations

IEEE in-text citations consist of numbers provided in square brackets, which correspond to the appropriate sources in the reference list at the end of the paper. The in-text citations numbers start at [1] and continue in ascending order throughout the paper – unless you are referring to a source you have already cited in your text, in which case you can use the previously assigned number.

Each in-text citation number should be enclosed by square brackets and appear on the text line, inside sentence punctuation, with a space before the bracket.

Example: Thevenin’s and Norton’s theorems are widely used for circuit analysis simplification [13].

Citations of references may be given simply as “in [1]...”, rather than as “in reference [1] ...”.

Blocked-off quotations or items

Should you choose to include a quotation of some length (more than 3 lines) or to insert a list into your paper, please use a block quotation by setting the block of quoted text as a paragraph of single-spaced lines.

- Blank lines should separate the block quote or list from the text that immediately precedes it and the text that immediately follows it.
- The text of the material should be indented one-half inch from the both margins.
- There is no need for quotation marks with blocked-off quotations, unless they appear in the original.
- For quoted material, provide the citation in square brackets after the quotation or after the author's name along with the page number(s) *before* the period [7, p. 14].

References

The **References'** list should appear at the end of the article in **Times New Roman 10 pt** and use the IEEE reference format. It should be relevant and mostly within 5 years from the research start date.

- The first reference should appear immediately beneath the **References** heading (no line space);
- A numbered list of references must be provided at the end of the paper. The reference list contains full details of all sources cited in-text. Reference list entries should appear in the order the sources are cited in the text of the paper, beginning with [1], and continuing in consecutive numerical order, from the lowest number to the highest. Reference list entries do not follow an alphabetical order by author or title of sources;
- References to government or corporate entities as authors should appear and be alphabetised on the reference list by full title (such as "National Security Agency") but be followed by abbreviations, acronyms, etc., if applicable "(NSA)";
- Unpublished works or private communications are to be mentioned within the text, but may be omitted from the reference list;
- References to electronic documents should include an appropriate Universal Resource Locator (URL) and date viewed; and
- Please ensure that all the references in the text are in the list of references at the end (and vice versa).
